Sourcing Intelligence for Resilient Supply Chains

ResiliLytics: SME-Native Procurement Resilience Framework

Quick Start Guide

Measure. Diagnose. Act.

Step 1 — Prepare Your File Your spreadsheet must include: • Supplier • Spend • Country • Historical_Costs (optional, semicolon-separated values) Example format: Supplier Spend Country Historical_Costs A 100000 USA 95;100;105 <i>Download the sample template if needed.</i>	Step 2 — Upload Your Data Go to Dashboard → Upload CSV or Excel. The system automatically: ✓ Validates structure ✓ Calculates 7 resilience dimensions ✓ Computes your composite score ✓ Classifies your structural posture <i>No setup required.</i>	Step 3 — Review Your Score Look at: • Composite Score (0–100) • Classification band • Primary Constraint Lens This tells you where your structural vulnerability lies.
Step 4 — Check Impact Ranking Scroll to Impact Ranking Table. Focus on dimensions with highest Weighted Impact. These are your priority mitigation drivers.	Step 5 — Generate AI Insights (Optional) Click: “✦ Generate AI Insights” Review: • Executive Insight • Risk Transmission Pathway • Priority Mitigation Actions • 90-Day Roadmap	Step 6 — Test Improvements Use Scenario Simulation Mode to: • Reduce concentration exposure • Reduce volatility intensity Watch your score update in real time.
Important Notes ✓ This is a structural procurement resilience tool — not predictive forecasting ✓ Data is processed in-session only and is not stored or retained ✓ ResiliLytics is free, non-commercial, and research-validated ✓ Applies SCOR-DS Source process principles — agility, cost, and reliability performance attributes		
The Philosophy ✓ Risk → Structure → Diagnosis → Action ✓ Procurement resilience is not the absence of disruption ✓ It is the structural capacity to anticipate, absorb, and act
