Recommendations

Your ResiliLytics Resilience Index is 83 (Stable). The biggest resilience constraints are: cost volatility sensitivity, geographic concentration, lead-time stability (proxy).

✓ Diversify sourcing geography to reduce single-country exposure and improve regional continuity.

✎ Stabilize cost/flow risk: renegotiate pricing terms, introduce buffer stock triggers, and monitor volatility monthly.

✎ Diversify suppliers to reduce concentration risk.

HOW TO USE THE RESILILYTICS APP (STEP-BY-STEP GUIDE)

STEP 1 – PREPARE YOUR FILE

Your file must contain:

- Supplier
- Spend
- Country
- Historical_Costs (semicolon-separated values)

Supplier	Spend	Country	Historical_Costs
Sunlight Mechanical	8270	India	92.35;86.5;50.45;18.59;43.37;70.2
Gamma Software	1860	China	69.93;63.22;34.72;60.51;44.46;97.45
Beta Transport	6390	Mexico	86.4;74.96;31.24;33.05;13.64;73.96
Astra Services	6191	Mexico	19.98;49.54;28.15;90.62;52.78;60.69
Eko Mechanical	6734	Mexico	72.6;22.54;64.4;58.59;28.28;94.86
Terra Packaging	7265	China	63.9;72.53;89.24;66.19;36.61;19.49
Sunlight Chemicals	1466	India	51.09;29.66;47.49;89.5;39.19;20.99
Delta Software	5426	Mexico	42.07;91.61;34.49;68.29;10.05;41.73
Sunlight Chemicals	6578	Brazil	37.43;24.82;58.07;53.63;72.32;34.25
Vertex Software	9322	China	31.97;25.15;29.69;60.23;46.35;15.84
Terra Services	2685	China	32.85;32.22;72.67;74.1;23.33;99.8
Vertex Services	1769	India	34.01;97.9;46.99;12.97;41.06;67.09
Sunlight Chemicals	7949	China	71.26;57.78;50.3;59.76;63.34;17.28
Sunlight Mechanical	3433	China	43.27;31.79;82.28;52.33;98.51;45.89
Beta Transport	6311	Mexico	83.48;81.85;23.56;55.74;72.62;87.25
Delta Metals	6051	India	39.34;29.82;74.0;82.86;41.38;18.66
Delta Software	7420	Mexico	94.65;45.78;56.6;85.39;70.81;76.17
Terra Transport	2184	Mexico	28.82;58.73;72.62;30.57;25.75;98.4
Quantum Transport	5555	India	56.5;33.47;99.66;96.89;60.25;89.44
Quantum Mechanical	4385	USA	26.98;35.1;73.03;86.2;87.07;46.41
Alpha Software	7396	Mexico	89.9;86.58;94.21;80.68;70.21;62.26

STEP 2 – UPLOAD YOUR FILE

Go to Dashboard → Upload CSV or Excel.

The screenshot displays the ResiliLytics Dashboard interface. At the top, a teal banner contains a note: "Note: This tool is part of a non-commercial academic research project. See disclaimer below." Below this, the dashboard header includes the ResiliLytics logo and the text "ResiliLytics Dashboard" and "Sourcing Intelligence for Resilient Supply Chains". A navigation bar shows "Dashboard" (active), "Help & FAQ", and "Contact".

The main content area is titled "About ResiliLytics" and includes a description: "ResiliLytics is a free next-generation platform designed to help Small and Medium Enterprises (SMEs) monitor and improve supply-chain resilience using intelligent risk-to-action insights." A link "> Read full description" is provided.

The "Upload Your Data" section is highlighted with a red box. It contains the instruction "Use your own .csv/.xlsx file, or grab a sample/template:". Below this, two links are highlighted with red boxes: "Download sample data (CSV)" and "Download blank template (CSV)".

The "Choose file" section is also highlighted with a red box. It features a "Drag and drop file here" area with the text "Limit 200MB per file • CSV, XLSX". To the right of this area is a "Browse files" button, also highlighted with a red box. Below the drag-and-drop area, a link "Upload a CSV or Excel file to see your dashboard." is highlighted with a red box.

STEP 3 – REVIEW YOUR SCORE

Observe:

- Gauge
- Classification
- Key metrics

STEP 4 – REVIEW IMPACT RANKING

Identify highest weighted impact dimensions.

STEP 5 – GENERATE AI INSIGHTS (OPTIONAL)

Click “Generate AI Insights.”

Impact Ranking

	Dimension	Score	Weight	Weighted Impact
0	CVS	34.4183	0.15	9.8373
1	GPR	79.0476	0.15	3.1429
2	LTV	86.5863	0.2	2.6827
3	FMS	91.2031	0.05	0.4398
4	SCR	94.125	0.25	1.4688
5	BIS	96.147	0.1	0.3853
6	ASS	100	0.1	0

AI Risk Interpretation & Action Plan

Executive Insight

Executive Summary: Composite Score 82 (Stable). Generally stable structural posture. Primary constraint lens: “Financial/volatility exposure”. Key limiting dimensions: Cost Volatility Sensitivity, Geographic Portfolio Resilience, Lead-Time Stability Proxy. Diagnosis: • CVS — Cost Volatility Sensitivity: Cost variability increases budgeting uncertainty and can trigger margin compression under shock conditions. • GPR — Geographic Portfolio Resilience: Single-country exposure increases disruption sensitivity (logistics, policy, FX, and regional shocks). • LTV — Lead-Time Stability Proxy: Timing variability (proxy) reduces planning reliability and increases reactive expediting and schedule churn.

> [Advanced Diagnostic Layer](#)

Priority Mitigation Actions

Priority 1
Dampen cost volatility: monitor variance monthly, renegotiate pricing mechanics, and prioritize high-variance inputs for stabilization.

Priority 2
Reduce single-country exposure: introduce at least one alternate sourcing geography for the most critical categories.

Priority 3
Improve operational stability: introduce disruption triggers, reliability scoring, and escalation rules for late/variable suppliers.

Structured 90-Day Resilience Roadmap

0–30 Days: Tag high-variance inputs; begin monthly volatility tracking and isolate the top variance drivers.

30–60 Days: Renegotiate pricing mechanics (indexed clauses / volatility bands) for high-variance categories; define thresholds for action.

60–90 Days: Establish margin protection playbooks (substitutions, contract clauses, escalation) and review volatility exposure quarterly.

Optional: Deep Analysis via ChatGPT

Copy this prompt into ChatGPT:

You are reviewing structured output from the ResiliLytics SME-Native Resilience Analytics Dashboard.

ResiliLytics is a minimal-input, weighted, multidimensional resilience modeling framework designed for Small and Medium Enterprises (SMEs).

The system calculates:

- A composite resilience index (0–100)
- Seven weighted resilience dimensions
- A structured 90-day mitigation pathway

STEP 6 - ADVANCED DIAGNOSTIC LAYER

Review the advanced diagnostic layer for the:

Systemic Risk Classification

- Structural Resilience Score
- Operational Stability Score
- Financial Exposure Score

Primary Systemic Constraint: Financial Exposure

Risk Transmission Pathway

- Identified Weakness
- Likely Consequence
- Intervention Direction

The screenshot displays the 'Advanced Diagnostic Layer' interface. It features two main sections: 'Systemic Risk Classification' and 'Risk Transmission Pathway'. The 'Systemic Risk Classification' section lists three scores: Structural Resilience Score (91.1), Operational Stability Score (91.4), and Financial Exposure Score (62.8). Below these scores, it states 'Primary Systemic Constraint: Financial Exposure'. The 'Risk Transmission Pathway' section lists three items: 'Identified Weakness: CVS', 'Likely Consequence: Margin volatility under cost fluctuation scenarios.', and 'Intervention Direction: Stabilize pricing mechanisms and renegotiation bands.' The entire interface is dark-themed with a red border highlighting the left side of the content area.

Advanced Diagnostic Layer

Systemic Risk Classification

Structural Resilience Score: 91.1
Operational Stability Score: 91.4
Financial Exposure Score: 62.8

Primary Systemic Constraint: Financial Exposure

Risk Transmission Pathway

Identified Weakness: CVS
Likely Consequence: Margin volatility under cost fluctuation scenarios.
Intervention Direction: Stabilize pricing mechanisms and renegotiation bands.

STEP 7 – TEST SCENARIOS

Use Simulation Mode to test structural adjustments.

NOTE

If the video tutorial does not load:

- All functionality is fully explained in this guide.
- You do not need video access to use the system.
